Military Expenditures and Industrialization in Africa ****Nabe, Oumar****

Journal of Economic Issues v17n2 PP: 575-587 Jun 1983 CODEN: JECIAR

ISSN: 0021-3624 JRNL CODE: JEI

DOC TYPE: Journal article LANGUAGE: English LENGTH: 13 Pages

SPECIAL FEATURE: Charts Appendix Equations References

ABSTRACT: Worldwide military expenditures are increasing at a dramatic rate, while socially and politically explosive needs are going unmet throughout less developed countries (LDC). Proponents of the military expenditures claim LDCs can enjoy benefits of development. Opponents argue that the expenditures impose a substantial burden on developing economies since resources are diverted from technology, capital infrastructure, and human capital. For LDCs in Africa, it appears that military expenditures have no positive effect on economic development. That is the finding of cross-sectional analyses using 1967-1976 data. However, the recursive, triangular ****model**** does demonstrate positive covariation between economic and social development factors and economic development.

The purpose of this study is to analyze the impact of military expenditures on industrialization and educational development in Africa. We use GDP manufacturing—the proportion of manufacturing in GDP—as measures of industrialization and the combined primary and secondary school enrollment as percent of population age group 5 to 19 as our measure of social development in education.

Our sample consists of twenty-six African countries: Algeria, Burundi, Cameroon, Central African Empire, Egypt, Ethiopia, Ghana, Ivory Coast, Kenya, Liberia, Libya, Madagascar, Mali, Morocco, Nigeria, Senegal, Sierre Leone, Somalia, Sudan, Tanzania, Togo, Tunisia, Uganda, Upper Volta, Zaire, and Zambia.

Our data covers the ten-year period 1967-1976. We analyze the impact of military expenditures on industrialization and education by constructing two composite development factors--one economic and one social--from a group of seven variables by using factor analysis. The economic and social development factors are used along with military

Articles

expenditures as independent ariables in a multiple regress an analysis and a path analytic ****model**** with GDP manufacturing and school enrollment as dependent variables.

The results of our study do not support any claims that military expenditures stimulate development. Out study indicates that military expenditures represent major opportunity costs and retard rather than advance industrialization and social development in education.
